Mayor Boody, of Brooklyn, stands charged by a presentment of Jury with official offenses for which the jurors would have indicted him and called him to the bar of a criminal court if they had not been wrongly in structed by the District-Attorney that they had no legal power to do so.

The Mayor asserts his innocence charges that the presentment must have been made on perjured testimons and was designed to injure his reputation and declares his intention to apply to a Judge to order the publication of the Grand Jury's minutes for his justi-

advance in methods on the part of the Bardwell mob. When the reported cause of the change is taken into consideration, however, it is doubtful whether the question of methods can enter into the discussion of the event at all. The despatches state that the father of the dead Ray sisters had a lingering doubt as to whether Miller was their murderer, and felt that while it would be an awful crime to hang an innocent man it would be worse to burn him. It doesn't seem to have occurred to any one to carry the fine distinction between known guilt and possible innocence far enough to suggest letting the prisoner come to a fair trial by jury. But then there was that waiting mob who had come to see a burning. The play opens with the capture and the escape. In the second scene there will be an Indian school, and the third will present an unwilling bride. You see, this all happened before Sir Walter Raleigh came over, in a stiff, high ruffle, and courted the beautiful Princess Pocahontas, and coaxed her to marry him and go to England.

The second act has three scenes, too. "Germany overpowered" is the first; "the school-girl's strategy" the second, and the third, "All's well that ends well." Between the acts Clara Constable will give a rocitation, Diddle Freieigh and Willie Badger will sing "After the Ball;" Little Wednesday will come out a day ahead and read "Jim Bludsoe," that famous engineer of the Prairie Belle, who "passed in his checks while holding her nozzle ag'in the bank till every galoot's ashore;" and Frank Reiter will read the pathetic tale of "The Bald-Headed Man." All for 25 cents, with that good feeling that comes to a fellow when he knows he's doe a good thing thrown in. Tickets are for sale at Held's, 319 Fulton street, and you don't need any further invitation than is contained in the knowledge, which everybody has, that there are inousands of poor little children in the metropolitan district whose parents are too poor and too ignorant to care for them these hot days and sultry, feverish nights, and that the charitably inclined must be parents to them. Children's tickets are 15 cents; grown folks, 25 cents.

In Mrs. Alexander's Parlors.

A most successful musical and literary entertainment in aid of the Sick Babies Fund was given Thursday evening at 160 West One Hundred and Twentysecond street, at the residence of Mrs. J. Alexander, wife of one of the Alexander Bros., furniture dealers in the Bowery, Mrs. Alexander, who has done time, cleared the lower part of her house of furniture and put a hundred or more chairs in her parlors. She was assisted in the work of preparation for its, could not cover the territory prescribed by Chief of Corps Dr. Foster. Two little creatures were found with small-pox, one having been left alone by the poor mother who thought it only had the rash; another child was frightfully scalded. In a cellar flat, so damp that snalls were almost as numerous as flies in a Summer kitchen, were two baby boys more dead than alive in the care of an old grandfather, scarcely able to move about. Their mother lay sick in the gloomy room, sensible of their misery, but utterly powerless to relieve it. The time lost in providing food, reporting contagious diseases, correcting unsanitary conditions, disinfecting unwholesome rooms and getting little outfits for the living, the dead and the unborn, left a great deal of work undone. But "The Evening World" is not in the habit of doing things by halves. What it cannot do thoroughly it does not undertake. The efficiency with which it has always labored for a larger corps of doctors, and a few days ago they were appeared.

The young Princes lead a strict but extremely happy life, every hour of the day having been carefully mapped out by the Emperor, so that whether at work or play no moment i lost. They have numerous pets and amusements, the Crown Prince and Prince Estel Fritz being aircady skilful horsemen, as was shown at their recent circus performance on the

Their dogs and other pets are also a great resource to them : but one of their greatest pleasures is boating, a taste which they have inherited from their father, and which they are able to frequently indulge when at Potsdam. All the young Princes are devotedly attached to their mother and little sisters, and their happiest lours are spent when with the Empress. Black Eyes Are Healthy.

It is said that the health of the bru nette type of eye is, as a rule, superio to that of a blonde eye. Black eye usually indicate good powers of physical endurance. Dark blue eves are most con mon in persons of delicate, refined or effeminate natures, and generally show weak health. Light blue and, much more gray eyes are most common in th hardy and active. With regard to diseases of the eye, brown or dark colored are weaker or more susceptible of in jury, from various causes, than gray of blue eyes. Ginger Brer.

This is best if made in the evening and bottled next morning. Squeeze a lemon and keep the juice, throw the peel into a two-gallon pan, with one pound of sugar loof, and one and a quarter ounces of sliced ginger, pour over them one gallon of boiling water; when lukewarm put in the lemon juice and mix a teaspoonful of German yeast with a little of the fluid until it is like cream; stir in the pan, cover and leave till morning. Then take out the lemon peel and ginger, skim off the froth, and bottle in half-pint stone bottles, and tie the corks down with twine. It will be ready in forty-eight hours.

Beenn and Lamb.

Chop together four pounds of lamb, me pound of bacon; add pepper, grated rind of lemon, one minced shallot and little thyme. Make in roll, cover with buttered paper, that with rough paste. Bake two hours, take off both covers and serve with peas.

Resping Fruit and Vegetables, It is surely of as much consequence

to know how to keep fruits and vege-tables as it is to know how to produce

them, and yearly more and more thought and attention are bestowed on the nubject of their preservation. It appears that experiments in France have shown that fults and vegetables stored under ordinary conditions, but heavily dusted with lime, will resist decay for a long time. Potatoes layered in lime kept for fourteen months and were in as good condition as when dug. Beets, onlone, apples, grapes and quinces similarly treated kept well for varying periods, out all for several months longer than they would have done ordinarily. The lime keeps away moisture, prevents the fruit from absorbing unpleasant odors, and destoys any microbes that may have found a resting place upon the skin or about the stem. This is a preventative within reach of all, and much cheaper than cold storage.
